

SÄKAPHEN® offers two cleaning products specially developed to clean and seal heavily soiled surfaces:

- » SÄKAPHEN® SAEKA-Cleaning Paste 80.750
- » SÄKAPHEN® SAEKA-Silicone Grease 81.750

Facts and Figures

International	> 1.000 customers worldwide > 80 electricity companies
DACH region	RWE, EON, Vattenfall, EnBW, Tennet, FMV, SBB, Voest Alpine
Public utilities	> 100 customers (D)

Cost reduction with the SÄKAPHEN® cleaning system: SAEKA Cleaning Paste 80.750 and SAEKA Silicone Grease 81.750

Sample Application

The use of the SÄKAPHEN® cleaning system enables the electricity industry to save 50-75% of its cleaning costs compared to conventional mechanical cleaning methods.

Physiologically harmless!

No labeling requirement!

Main fields of application in energy and industrial sectors

- The main application area is high and mid voltage power grids (110 kV to 765 kV in the USA), especially in substations.
- SAEKA Cleaning Paste 80.750 and SAEKA Silicone Grease 81.750 ensure a reliable power supply through a safe power transmission.
- Electrical systems, such as transformers, rectifiers and switches / switchgear are also cleaned and protected with the two products.
